

**Project:** Pumping Station Upgrades (VAU-008)

**Updated:** March 22, 2018

**Description:**

Upgrades to be done to pumping stations which are used to assist the transfer of water from one location to another by increasing pressure.

The pumping station's electrical, mechanical and fuel systems will all be upgraded.

**Benefits to Community:**

Upgrades to the pumping stations will improve operational efficiency, protect the environment and extend life of the pumps.

*Pumping Station Maintenance*
